

**SAP® Certified Mobile App – works on SAP ECC and S/4HANA.**

## **RACE Dynamic Forms' low-code/no-code technology lets administrators create and modify digital forms in less than 30 minutes.**

- Create, edit, email and print digital forms with ease and mobility
- Flexibility to adapt forms to ongoing business needs and innovation
- Track field work and update stakeholders with real-time data

## **RACE™ Dynamic Forms – No-Code/Low-Code Configurable Digital Forms Solution**

### **REPLACE MANUAL, TEDIOUS AND LINEAR FIELD DATA CAPTURE**

Industrial plants are realizing the value of operational data in terms of reducing equipment downtime, risk assessment and mitigation, and safety and regulatory compliance. Capturing field data, however, has traditionally been a laborious, slow and inaccurate process. Manual data capture doesn't give a real-time picture of the plant's status. Mobile technology has revolutionized data capture and sharing. Front-line workers can now quickly, efficiently and accurately record maintenance and compliance information digitally via mobile device. The data is also immediately entered into SAP so that decision makers can analyze it in real time to make informed operational choices.

### **OPERATOR ROUNDS AND INSPECTIONS**

When equipment fails, plant production can grind to a halt until repairs are made. Each time production lines are down, revenue stops flowing, profit margins are squeezed and customer relationships endangered. Plant maintenance departments conduct operator rounds and inspections to find issues that could lead to unplanned downtime. Traditional data collection processes are too slow and error-prone to permit timely preventative action. Configurable, digital operator rounds and inspection checklists – editable to meet changing business needs – can provide quick, thorough and accurate information to decision makers in real time. Work orders can be issued in mere moments to correct an issue before it becomes a downtime-producing problem.

### **HEALTH AND SAFETY COMPLIANCE**

Industrial plants must deal with overlapping federal, state and local regulatory authorities. This makes it tough to remain compliant. It also exposes the plant to potential sanctions. Agencies are rewriting rules and regulations in response to global health and worker safety concerns. Traditional data collection methods often fail to collect all environmental, health and safety compliance information. They're also

tedious to enter into SAP, meaning it takes valuable time for data to reach compliance managers. Plants face additional risks for incidents and potential regulatory fines, sanctions and/or lawsuits.

### **OVERCOME THESE CHALLENGES**

Innovapptive – a Connected Worker platform provider – believes in getting jobs done better, faster, cheaper and safer. We've developed RACE Dynamic Forms. RACE Dynamic Forms offers more than 150+ pre-packaged and reconfigurable digital forms that can be completed on a mobile device. These dynamic forms can be integrated into work order management, inventory management or other relevant assignments your front-line worker needs to carry out in addition to field data collection.

### **A PATENTED PLATFORM TO EMPOWER YOUR TEAMS**

Utilize low-code/no-code technology to create, edit, modify and deploy digital operator round checklists, compliance forms, risk assessments, health questionnaires, safety checklists, etc. Use preconfigured forms from your library or ours. Or make your own – in 30 minutes or less. No need to wait on IT. Deploy the digital forms for immediate use. Flip the page to learn more...

## FEATURES

- Supports Android, iOS and Windows applications
- Runs on Tablet Devices, Mobiles and Desktops
- Customizable dashboard
- Works in Online or Offline modes
- Automate workflows integrated with system of records
- Push changes in real-time
- Real-time data validation
- Role-based access to forms
- Integrates with hands-free devices
- Configurable field types and validations

## FUNCTIONALITIES

- Simple, easy-to-use, mobile user experience
- Forms dashboard
- Search forms
- Filter forms
- Favorite forms
- Advanced form field types
- Field validation rules
- Form instructions
- Form approvals
- Save drafts
- Save forms as PDFs
- Email/Print forms
- Offline outbox

## WHAT USERS ARE SAYING ABOUT RACE DYNAMIC FORMS

“RACE Dynamic Forms is what truly sets Innovapptive apart. No one else offers such a solution. We operate in a highly regulated environment, so compliance is extremely important to us. We simply couldn't keep up with all the changes, and with an inefficient paper-based process, we were falling further behind. Now, thanks to RACE Dynamic Forms, our compliance measures have gone from slow, time-consuming and labor-intensive to fast, easy and efficient. No-code digital forms have been a complete game-changer throughout our enterprise.”

Jim Hilt – EHS Director

**Conditional Logic**  
Show/Hide (1) Active/Inactive (0) Mandatory/Optional (0) Auto Populate Rules (0)  
Conditions that determine the visibility of the element.  
Hide the field when  All  OR  Any of the below conditions match.  
Hazardous Place? is equal to No  
+ Add Another Condition

**Forms From Team**  
View and accept submissions of your team

**Exclusive Favorite Filter**  
Quick toggle to see only favorites

**Offline Outbox**  
Overview your pending submissions for synch. Review and re-submit for errors.

**Filter Posted Forms**  
Refine the list to see what you want

**Search Forms**  
Easy search on pulling the list down
